

OFFICIAL USER GUIDE

687 Italy

Travel Companion

Plan your trip before departure. Keep your bookings, itinerary, budget and practical travel tools together while you explore Italy.

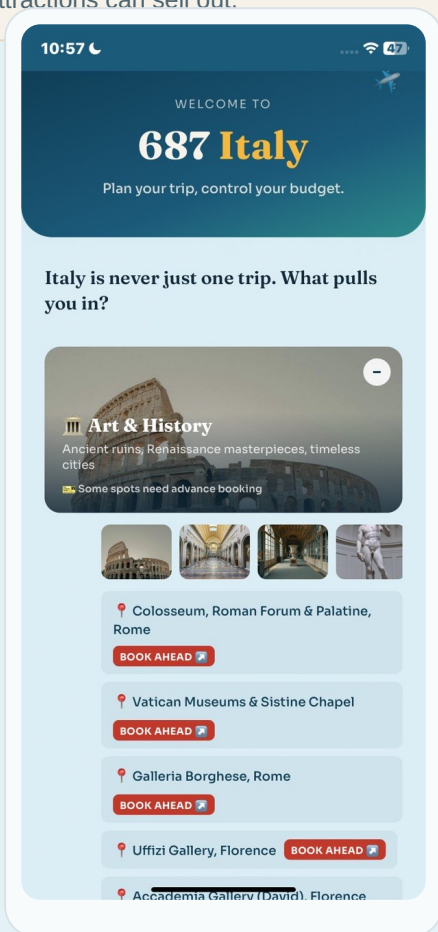

PLAN · BOOK · ORGANIZE · TRAVEL
Before your trip and while you are in Italy

DISCOVER

Start with what pulls you in

The opening screen is more than a welcome page. Explore Art & History, Sea & Coastline, Mountains & Lakes and food ideas. Expand a category to see places that may need advance booking before your trip.

Tip: If you see BOOK AHEAD, consider reserving early - popular attractions can sell out.

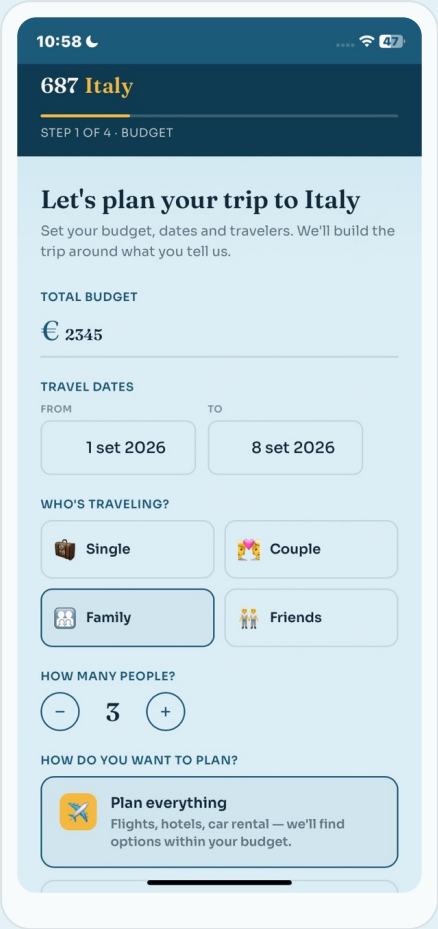

STEP 1 OF 4

Set the trip basics

Enter your total budget, travel dates, type of trip and number of travelers. Choose Plan everything if you want 687 Italy to guide you through flights, accommodation and car rental.

Tip: Your budget becomes the base for the daily spending system later in the app.

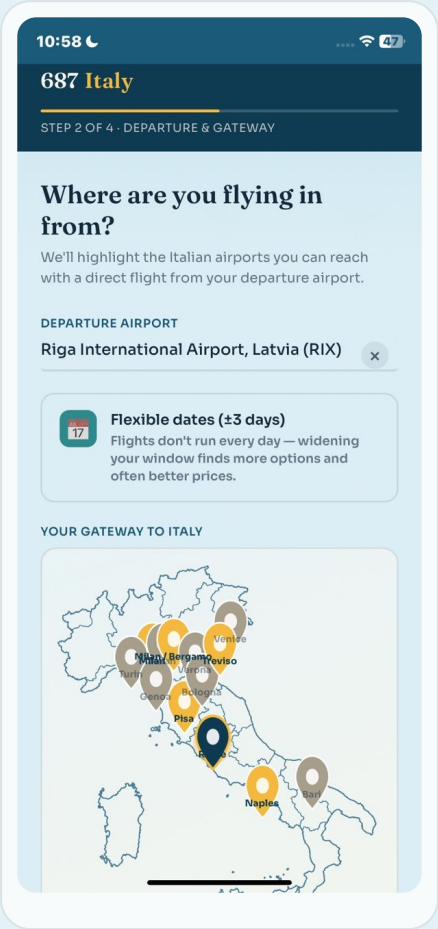

STEP 2 OF 4

Choose your gateway to Italy

Enter your departure airport. 687 Italy highlights Italian airports that can be reached directly and lets you choose the arrival airport that fits your trip.

Tip: Flexible dates can reveal more direct options and sometimes better fares.

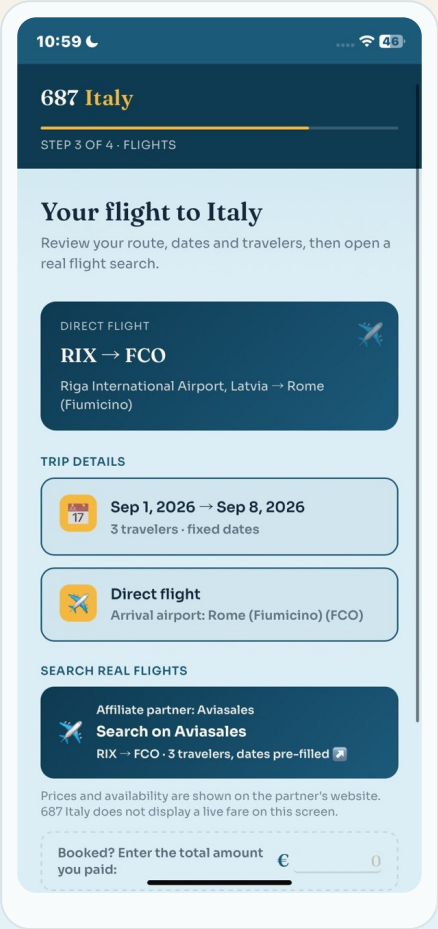

STEP 3 OF 4

Search a real flight

Review your route, dates and travelers, then open the partner search. Your selected route is carried into the search flow when supported.

Tip: Affiliate partner links open an external provider. Prices, availability and booking conditions are controlled by that provider.

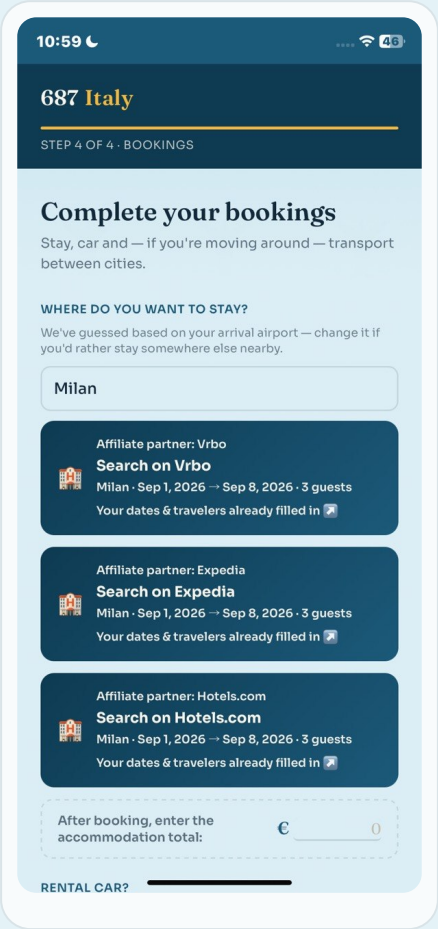

STEP 4 OF 4

Compare accommodation

Choose where you want to stay, then search using the available accommodation partners. Your city, dates and traveler count are shown before you leave the app.

Tip: After booking, enter the accommodation total so it becomes part of your trip budget.

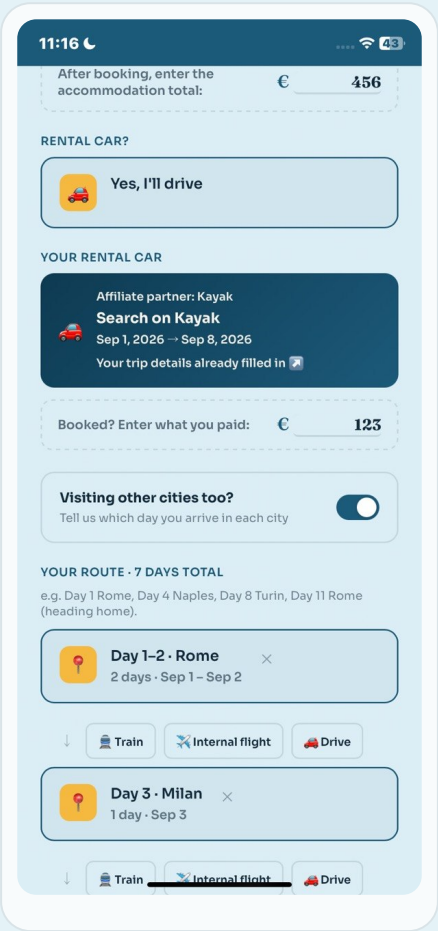

STEP 4 OF 4

Search rental cars

If you plan to drive, use Kayak from the rental-car section. The search is connected to your trip and arrival-airport context.

Tip: After booking, enter what you paid. The cost is then included in your overall budget picture.

MULTI-CITY

Build a route across Italy

Turn on Visiting other cities too? and assign the day you reach each city. Between cities, choose how you expect to travel: train, internal flight or drive.

Tip: This route becomes the structure of your Itinerary and Drive calendar.

BEFORE YOU ARRIVE

Plan before the live tools unlock

Itinerary is always available before your trip, so you can prepare cities and transfers in advance. When GPS verifies that you are outside Italy, the app can provide a 2-hour full preview so you can explore the live tools before departure.

Tip: After the preview ends, Itinerary remains available. Live Italy tools unlock again when GPS verifies that you are physically

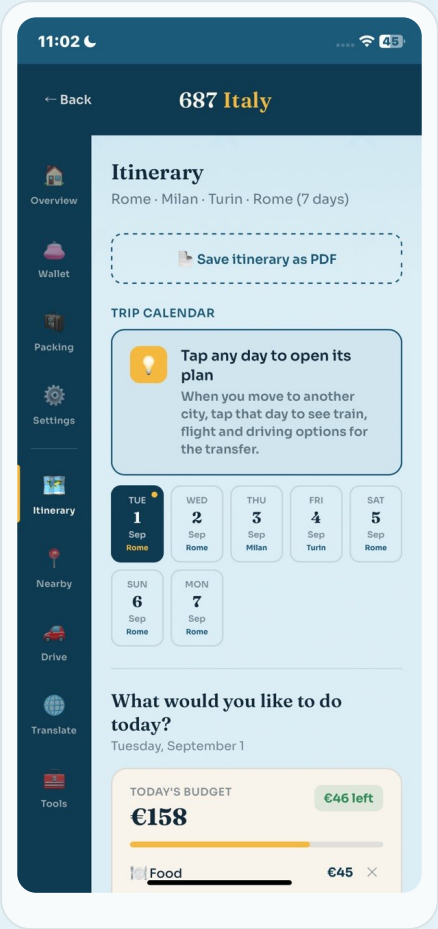

ITINERARY

Tap a day to open its plan

The Trip Calendar shows the city assigned to each day. Tap any date to open the daily plan. On a city-change day, 687 Italy shows the transfer you need to make.

Tip: You can save the itinerary as a PDF for a simple offline reference.

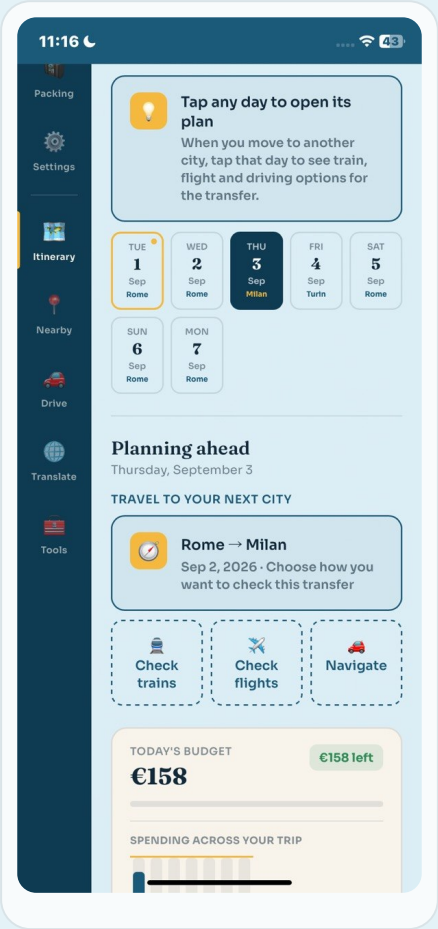

CITY TRANSFERS

Check trains, flights or driving

Open the day of a city transfer and choose Check trains, Check flights or Navigate. This lets you prepare the move to your next city before the travel day arrives.

Tip: Use this during planning as well as during the trip - you do not need to wait until you are already in the next city.

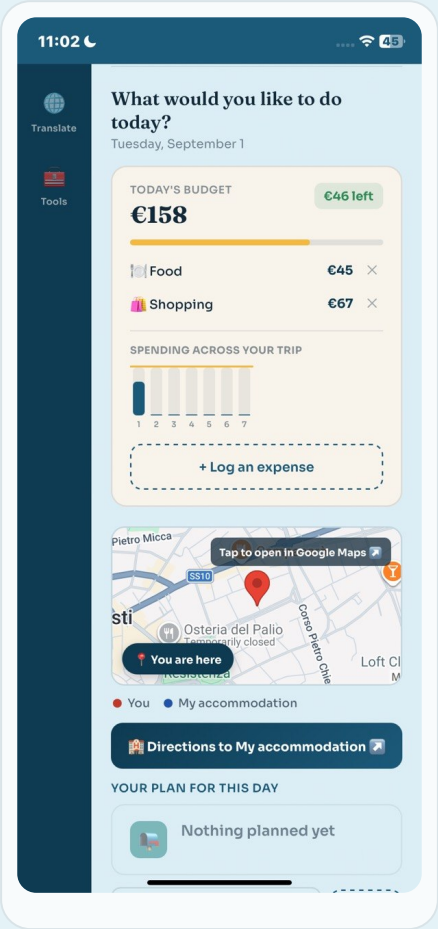

DAILY BUDGET

Control spending day by day

Log expenses during the trip and watch the remaining amount for the day. 687 Italy recalculates the suggested average for the remaining days as you spend more or less than planned.

Tip: Overspend today lowers the suggested average for the remaining days; saving today increases it.

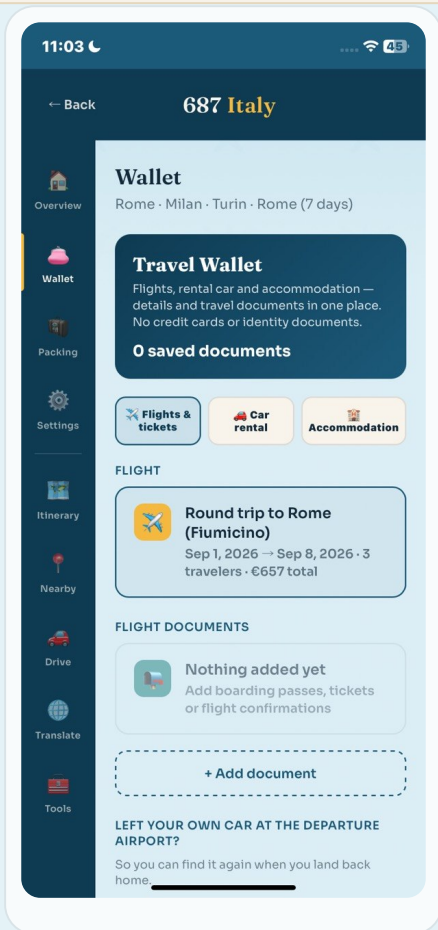

WALLET

Keep travel documents together

Travel Wallet keeps flight, car-rental and accommodation details in one place. Add tickets, boarding passes or confirmation documents when you need them.

Tip: The wallet is for travel documents and booking references - not credit cards or identity documents.

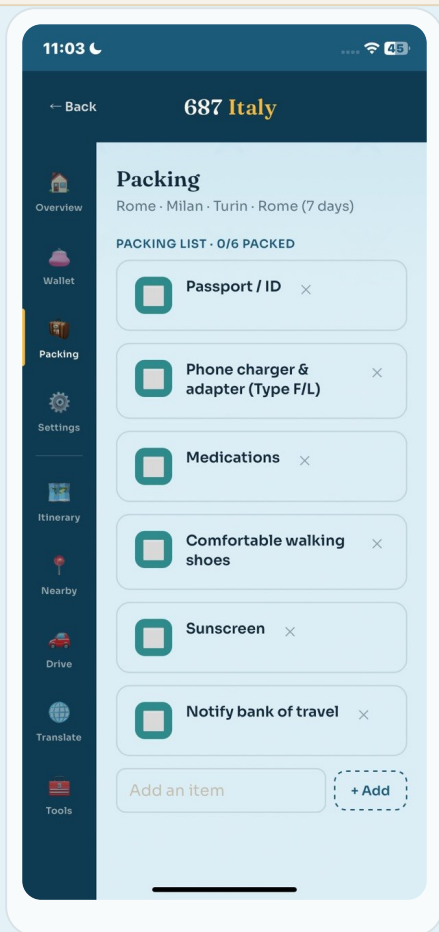

PACKING

Use the packing checklist

Start from the suggested essentials and tick items off as you pack. Add your own items at the bottom whenever your trip needs something extra.

Tip: The list stays connected to the current trip so you can check it again before leaving.

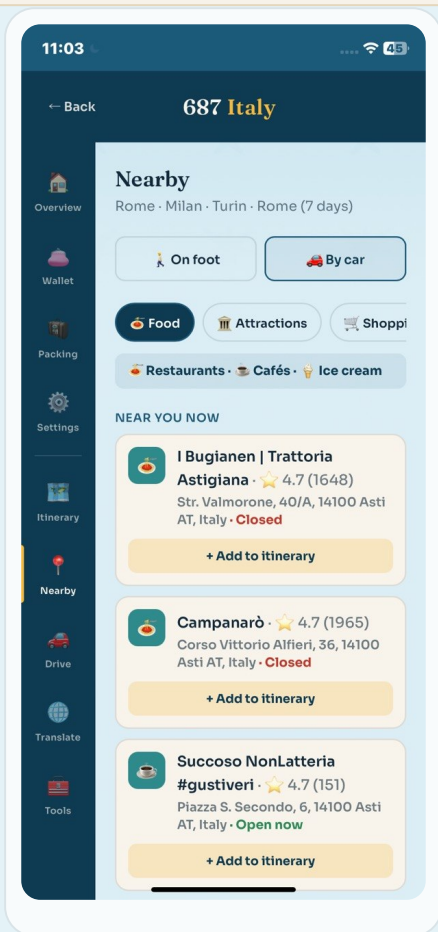

NEARBY

Find useful places around you

Nearby uses your current position to find restaurants, cafes, attractions, shopping and other places. Switch between On foot and By car, then add useful places directly to your itinerary.

Tip: Open/closed status and ratings come from live place data and can change.

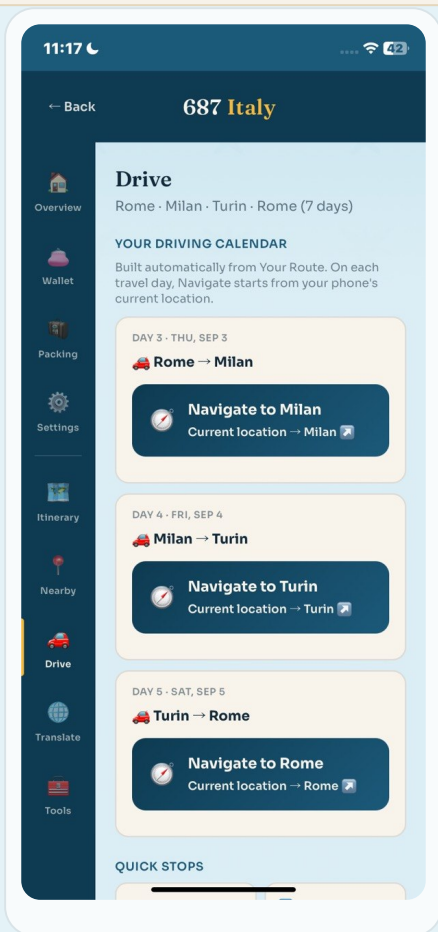

DRIVE

Follow your driving calendar

If your route includes driving, Drive automatically builds the travel days between cities. Each navigation button starts from your phone's current location and points toward the next city.

Tip: Always follow road signs, local restrictions, ZTL rules and current traffic conditions.

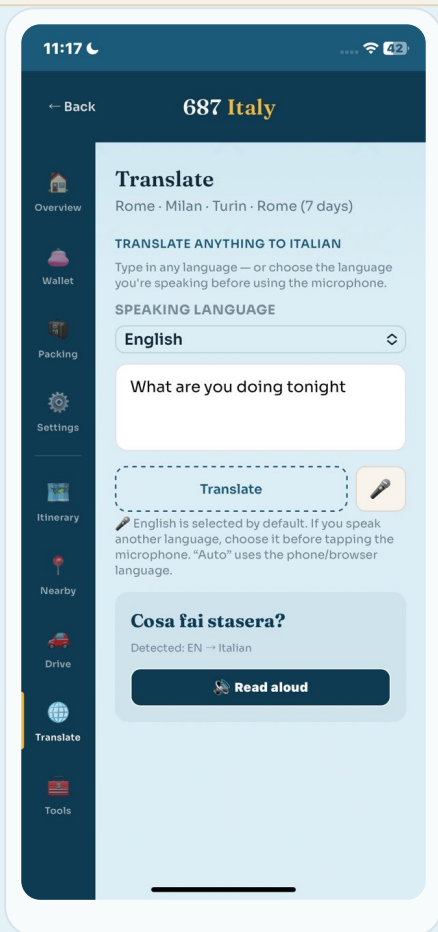

TRANSLATE

Type or speak, then hear Italian

Choose the language you are speaking, type a phrase or use the microphone. 687 Italy translates it into Italian and Read aloud can speak the result for you.

Tip: If you use the microphone, choose the correct speaking language first for better recognition.

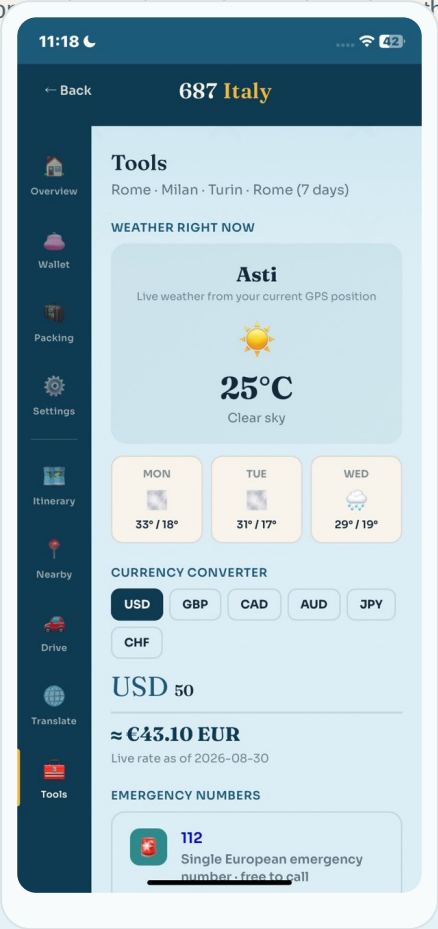

TOOLS

Weather, currency and emergency help

Tools combines live weather for your GPS location, a currency converter and practical emergency information. It is designed for quick checks while you are moving around Italy.

Tip: Weather and exchange-rate information require an internet connection and may change throughout the day.

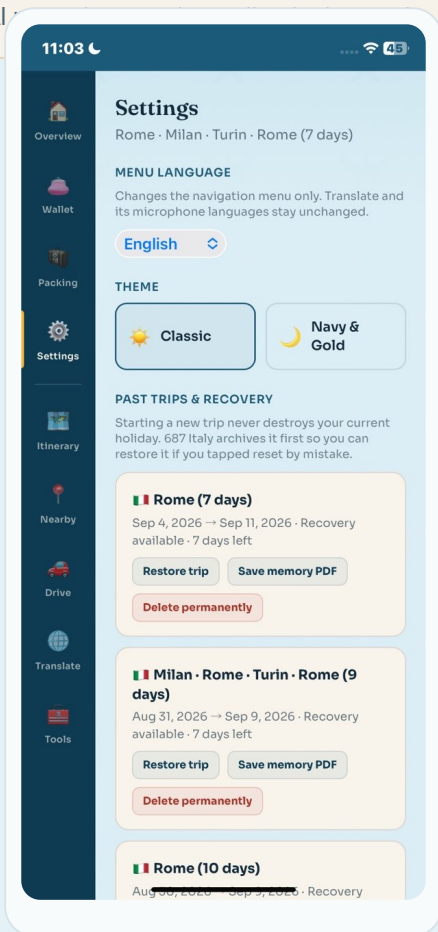

SETTINGS

Language, theme and trip recovery

Settings lets you change the menu language and visual theme. Previous trips can be restored for a limited recovery period, saved as a memory PDF or deleted permanently.

Tip: Starting a new trip archives the current trip first, so an accidental

687 ITALY

Ready for Italy

Use 687 Italy before departure to plan and book, then keep using the same trip during your stay for budget, itinerary, nearby places, navigation, translation and practical tools.
